Profile

I am a **UI/UX Designer** with nearly **half a decade** years experience of creating **intuitive** and **responsive dashboards** and **websites** for media and insurance platforms. I combine **user research**, **motion principles**, and **modern interface design** to deliver functional and visually engaging digital products. My design approach focuses on **clarity**, **emotion**, and **business growth** through *user-centered thinking*.

I help creative minds convert their ideas into functional and interactive graphical interfaces and experience.

Experience

Feb 2023

Product Design (Dashboard & Website Design)

Leenkaz (insurannce broker agency)

- Research: deep product research on Insurance broking, personal whatsapp survey to gain user insights and preferences.
- Created wireframes, prototypes, and interactive mock-ups to demonstrate design concepts and facilitate feedback.
- Developed user flows and information architecture to ensure seamless navigation and efficient workflows.
- Designed a user dashboard and policy purchase flow, resulting in a highly positive feedback on the interface's ease of use.
- Designed a mobile view for both website and the User Dashboard.

Aug 2022

UI/UX Design (Website Design)

The Nigerian Observer (a news blog website)

- Created wireframes, interactive prototypes, and visual designs to showcase proposed layouts, navigation, and content presentation.
- Restructured the information architecture and navigation for a news blog with more articles, aiming to increase article discovery and time-on-site.
- Integrated social sharing features and other engagement mechanisms to encourage user interaction and community building.

2022 - 2025

Other Freelance

- Created an election blog landing page for punch.ng
- Created a design and development consulting website for Virals.ng
